SUMMARY

Product Manager specialising in product analytics, with 6+ years of experience delivering data-informed, user-centric solutions across accounting, logistics, ERP, and crypto intelligence platforms — including analytics frameworks, freemium growth loops, and AI-powered content systems that drive measurable product and business outcomes.

PROFESSIONAL EXPERIENCE

Yirifi — Crypto & Digital Asset Intelligence Platform

Product Manager · Sep 2025 – Jun 2026

- Designed a product analytics framework covering distinct user tiers, enabling data-driven feature prioritization and content investment decisions
- Defined B2C vs. B2B segmentation strategy — freemium access model for mass acquisition, premium advanced tools for enterprise clients — directly informing roadmap and resource allocation
- Architected a freemium growth loop: content discovery → gated platform modules → upsell to advanced team collaboration features
- Collaborated with design to map cross-module synergies and simplify onboarding across the platform, resolving a conflated website/web-app UX
- Led full marketing website redesign with module-specific landing pages and CTAs funneling users directly into platform experiences
- Created a module-specific content framework with defined pillars aligning with distribution channels to drive platform-native engagement
- Architected a multi-agent AI content pipeline automating end-to-end production of 20+ content assets per week
- Produced comprehensive documentation and a Knowledge Base of the entire product including FAQs and an in-app tutorials bot

Karobar — Mobile & Web Accounting Platform

Product Manager · Jan 2024 – Aug 2025

- Led product through a full-stack revamp across Mobile and Web for a 500K+ user base
- Designed and ran a 50-company closed beta; aggregated 1,200+ feedback points from calls, ticket logs, store reviews, and interviews into a weighted backlog
- Instrumented the AAARRR metric tree into end-to-end Mixpanel dashboards for self-serve product insight — D30 retention from 38% → 54% and 30% DAU growth via targeted nudges
- Led initial market research for SEA and African expansion; launched the app in 3 new markets (Indonesia, Nigeria, Philippines), grew to 10K users in 3 months, and built the monetization roadmap
- Implemented integrated Meta & Google ad-pixel analytics, enabling multi-channel ROAS measurement
- Produced comprehensive documentation and a Knowledge Base of the entire product including in-app tooltips, FAQs, and video tutorials

Seven Ledger — ERP for Wholesale Businesses

Product Manager · Jan 2023 – Dec 2023

- Ran deep-dive interviews to translate complex wholesale workflows into BRDs/PRDs and detailed acceptance criteria for 12 enterprise distributors, converting insights into bespoke ERPs
- Mapped the end-to-end metric tree and north-star KPIs for users' daily workflows

Upaya City Cargo — Logistics Super-App

Product Manager · Sep 2021 – Dec 2022

- Scaled a brand-new on-demand 2-wheeler fleet from zero to \$200K GMV and net-positive operations in Year 1; defined the launch plan, rider incentives, and unit economics that delivered positive contribution margin by month 6
- Authored crystal-clear PRDs & acceptance tests for 30+ features (live-tracking, COD reconciliation, geo-location)
- Created live operations dashboards in Grafana and Looker Studio with operation-level KPIs — on-time delivery SLA stayed above 90% while idle rider time fell below 12%
- Balanced a two-sided marketplace of drivers and clients and built seasonality-aware demand/supply forecasters
- Led enterprise integrations with Foodmandu and eSewa that powered 60%+ of order volume
- Communicated data-driven insights to leadership; dashboards and ROI memos secured additional capex for expansion

EDUCATION

BBA (Investment & Economics) – 2022 · King's College, Westcliff University

SKILLS

- Product Analytics** Dashboarding (Looker, Power BI, Google Data Studio, Mixpanel) | KPI Definition | Funnel Analysis | A/B Testing | Data Validation | AAARRR Metric Trees
- Market Research & Strategy** User Interviews & Surveys (Qualitative & Quantitative Research) | Competitive Benchmarking & SWOT Analysis | Market Size Estimation | Go-to-Market Strategy | Industry Trend Monitoring | Freemium Growth Modeling | Content Strategy & Editorial Planning
- Requirements & Delivery** User Stories | Acceptance Criteria | Process Flow Diagrams | Functional & Non-Functional Requirements | Gap Analysis
- Product Development Lifecycle** Agile (Scrum/Kanban) | Roadmap & Sprint Planning | Backlog Grooming | Release Management
- UI/UX Collaboration** Wireframing | User Journey Mapping | Mobile/Web App Design Review | Website-to-Web-App UX Separation
- AI & Automation** Multi-Agent Content Pipelines | LLM Prompt Design | Automated Content Generation
